MEMORANDUM FOR THE RECORD

SUBJECT: Fiber Optic Viewer Modification, Project #02067

25X1 1. After discussions with TID on the proposed modifications of the
25X1 Fiber Optics Viewer and evaluation of [] proposal for the
modifications, a separate proposal was solicited from [] TID
determined that they did not require the power assist film drive and
felt that they could not support the cam correction modification at this
time, in view of [] lack of guarantee of achievable perfor-
mance and moderate projected achievable accuracy. Therefore []
was only asked to bid on the digitizing aspects.

25X1 2. [] has submitted a bid to do the desired work for [] as
25X1 compared to [] The work statement in both cases
was essentially the same. In addition, [] will be able to check-
25X1 out the complete [] system under the current time and materials contract.
25X1 [] declined any responsibility for the [] check-out except under a
separate contract.

25X1 3. It is therefore recommended that the Office of Logistics utilize
the existing funds authorization for modifying the fiber optics viewer with
[] be informed that we have no further
interest in their proposal at this time.

4. After the encoder installation is complete and the system is
checked out, the advisability of the cam correction can again be taken
under consideration if TID so desires. At that time we will better be
capable of evaluating the advisability of an error compensation system.
